EDUCATION

Concordia University

Sept. 2018 – Dec 2021

Bachelor of Computer Science (B.CompSc), Graduated with Distinction

PROJECTS

Rental Housing Platform | *Code* *Next.js* | *Tailwind* | *AWS* | *Shadcn* | *Prisma* | *Node.js* | *Redux*

- Built and deployed a **full-stack** rental platform on **AWS** supporting scalable property listing and user workflows.

Travel Planner Application | *Code* *React* | *Firebase* | *Tailwind* | *Gemini API* | *GCP*

- Developed an **AI-powered** travel itinerary generator using **Gemini API** to create personalized vacation plans.

Tennis Match Winner Predictor | *Code* *Python* | *Scikit-learn* | *Numpy* | *PySpark* | *Pandas*

- Built a **machine learning model** using **logistic regression** and **Markov chain** to predict match outcomes.

EXPERIENCE

TriNmax

Oct 2023 – Dec 2023

Software Developer

Montreal, QC

- Developed billing components and **unit/integration test suites** within an invoice processing solution integrated with **IBM Maximo Application Suite**, using **Angular** and **Jest**, reducing **production load** by **25%**.
- Designed reusable **Terraform infrastructure modules (IaC)** to provision and manage **Google Cloud Platform (GCP)** and **Dockerized resources**, improving **consistency** and **CI/CD deployment efficiency**.

Broadsign International

Jan 2022 – April 2023

Software Developer

Montreal, QC

- Led **end-to-end** development of production-grade web dashboards using **Vue.js** and **C# .NET REST API** in a **microservices architecture**, implementing **Test Driven Development (TDD)** and **Docker containerization** to deliver scalable solutions supporting **1,000+ active users**.
- Engineered a **custom GitHub Actions workflow** to **automate code quality gates** and **Pull Request (PR) validations**, reducing manual code review effort by **30%** and **accelerating CI/CD pipeline throughput** for a cross-functional team of **10+ engineers**.
- Designed **unit/integrated automated testing suites** using **Jest**, **Playwright**, and **NUnit**, delivering **90%** test coverage, improved software quality, and a **30% reduction** in production bugs
- Created comprehensive **Datadog** and **Google Analytics** dashboards to monitor **frontend performance**, **user behavior**, and **application health**, enabling real-time analytics that **reduced MTTD** by **20%**

Conova Inc

Jan 2021 – Jan 2022

Cloud Developer

Montreal, QC

- Managed a **serverless GraphQL API architecture** leveraging **AWS AppSync**, **AWS Lambda**, and **AWS DynamoDB** optimizing data fetching patterns to **improve data access speeds** and **reduce latency** by **30%**.
- Streamlined **third-party authentication** workflows and complex account merging logic by implementing custom **Auth0 Actions**, enhancing the user onboarding experience
- Optimized platform security by engineering an **IP blacklisting service** via **Amazon Web Application Firewall**, mitigating **malicious traffic and bot attacks** by **20%**
- Standardized infrastructure deployment by building **reusable AWS CloudFormation templates**, ensuring consistent environment provisioning and **reducing costs** monthly by **\$1k+**

Consoltec

May 2020 – Sept 2020

Web Developer Intern

Montreal, QC

- Optimized the **user interface** for a language translation tool using **JavaScript**, **HTML**, **CSS**, and **Kendo UI**, implementing performance improvements that **reduced UI defects** by **20%**.
- Engineered a **custom Windows URL protocol handler**, enabling **deep linking**, **parameterized launches**, **input validation**, and **improved user experience** across integrated systems.

TECHNICAL SKILLS

Languages: Python, C#, Java, Perl, SQL, JavaScript, TypeScript, HTML, CSS

Frameworks: React.js, Vue.js, Angular, Node.js, .NET 6, Next.js

Developer Tools: Git, Docker, CircleCI, AWS, GCP, Postman, Firebase, Rider, Jira, Prisma, PostgreSQL
